1. Corps of Engineers Officer Visits Saudi Arabia. Major General Fred J. CLARKE, Director of Military Construction, U. S. Army Corps of Engineers, accompanied by Mr. L. W. McBRIDE of his office and Colonel Andrew D. CHAFFIN, Chief, U. S. Army Engineer Division, Mediterranean, visited Dhahran, Riyadh, Jidda October 29- 30 on a tour of inspection of Corps of Engineers projects in the area. While in Riyadh, General Clarke paid a courtesy call on Prince SUL ibn Abdul-Aziz, Minister of Defense and Aviation; Chief of Staff General Abdul MUTLAQ; and other Saudi officers with whom he discussed the proposed military construction projects for the Saudi Army to be erected under Corps of Engineers supervision. In Jidda General Clarke inspected the site of the television transmitter being constructed under Corps of Engineers supervision. (UNCLASSIFIED)

Comment: During his meeting with General Clarke, Prince Sultan indicated that he might take up through diplomatic channels the question of United States Government absorption of some of the engineering costs for the military construction project but noted that he was prepared to have the Saudi Government pay these costs rather than to delay implementation of the project. (CONFIDENTIAL)

2. U. S. Helicopter Suffers Maintenance Malfunction Off Jidda. A United States Air Force DC3C helicopter suffered a normal maintenance malfunction October 30 that forced it to put down in the Red Sea about 75 miles southeast Jidda. Fortunately, the helicopter, which carried a pilot and crew of three, was of an amphibious variety and thus able to take off again 45 minutes later following emergency repairs. The helicopter was one of two on their way from Jidda, where they had stopped for refueling, to Asmara. They had been rerouted through Jidda due to the closing of the Khartoum Airport.
